PROFESSIONAL SUMMARY

Software Engineering student (B.Tech, Computer Science and Engineering, CGPA: 8.10/10) with hands-on experience in backend development, full-stack web development, and RESTful API design. Proficient in Java, Python, JavaScript, SQL, Spring Boot, Node.js, React.js, and MongoDB, with applied experience in AI/LLM integration using LangChain, LangGraph, Retrieval-Augmented Generation (RAG), and vector embeddings. Built AI-powered backend services including a RAG-based document assistant and an ATS-inspired resume evaluation platform. Seeking Software Engineer, Backend Developer, and Full-Stack Developer internship opportunities.

EDUCATION

Ajay Kumar Garg Engineering College

Ghaziabad, Uttar Pradesh

Bachelor of Technology – Computer Science and Engineering; CGPA: 8.10/10

2023 – 2027

- Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, OOP, SDLC

EXPERIENCE

Software Developer Intern

July 2026 - Present

Mobcoder

- Build and maintain full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implement AI technologies including LangChain, LangGraph, MCP servers, RAG, text chunking, and vector embeddings.
- Develop AI-powered features and integrate Large Language Model (LLM) APIs into production applications.
- Enhance embedding storage by adding metadata to improve retrieval accuracy and search relevance.
- Collaborate with mentors and cross-functional team members using Git and GitHub in an Agile development workflow.

Frontend Developer Intern

Aug 2025

CodeAlpha(Virtual Internship)

- Developed responsive, cross-device web interfaces using HTML, CSS, JavaScript, and React.js.
- Integrated RESTful APIs and optimized UI performance and responsiveness across multiple devices.
- Performed debugging, unit testing, and component-level validation to improve application reliability and user experience.
- Collaborated in an Agile/Scrum development environment while writing clean, reusable, and maintainable code.

PROJECTS

AI Document Assistant (RAG Service) | Python, FastAPI, LangGraph, LangChain, Qdrant, Sentence Transformers, GroqLlama 3.3 2026

GitHub

- Built a Retrieval-Augmented Generation (RAG) backend that enables semantic question answering over uploaded PDF documents.
- Designed a document ingestion pipeline: PDF parsing, text chunking, embedding generation, and vector storage using Qdrant.
- Architected a ReAct-based AI agent with LangGraph and LangChain for retrieval, summarization, document management, and web search.
- Implemented multi-document support with metadata filtering, UUID-based chunk indexing, and semantic search.
- Integrated Groq Llama 3.3 for response generation and Tavily Search for real-time external knowledge.
- Engineered a modular FastAPI backend with clean separation between ingestion, retrieval, and agent orchestration layers.

Resume Analyzer | Python, Flask, OpenAI API, NLP, PostgreSQL, Plotly

2026

GitHub

- Built an ATS-inspired resume evaluation platform integrating OpenAI APIs for automated candidate scoring.
- Implemented Natural Language Processing (NLP) pipelines for resume parsing, keyword extraction, and job-resume matching..
- Designed interactive dashboards using Plotly for candidate insights and score visualization.
- Built RESTful Flask APIs for real-time resume analysis and automated feedback generation, backed by PostgreSQL.

Weather Application | JavaScript, HTML5, CSS3, OpenWeatherMap API

2025

GitHub

- Developed a weather forecasting application consuming OpenWeatherMap APIs with asynchronous calls and dynamic UI rendering.
- Displayed temperature, humidity, wind speed, and location-based forecasts with robust error handling.
- Deployed the application on Vercel for global accessibility and fast load times.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, C++, HTML5, CSS3

Frontend: ReactJS, Bootstrap, EJS, Responsive Design

Backend: Spring Boot, Node.js, Express.js, REST APIs

Databases: MongoDB, PostgreSQL, MySQL

AI/ML Tools: LangChain, LangGraph, RAG, Qdrant, Sentence Transformers, FastAPI, Groq

Tools & Concepts: Git, GitHub, Maven, Postman, VS Code, Cloudinary, DSA, OOP, DBMS, OS, Computer Networks, MVC, SDLC

CERTIFICATIONS

- Full Stack Web Development – Udemy
- Python Programming – Udemy
- Problem Solving – HackerRank
